

# Control System

ENVIRONMENTAL  
COKE HANDLING  
OPERATION

The Control System is designed especially for controlling and monitoring all the equipment and processes in the ECHO system. It is programmed for a safe, efficient, reliable and economical operation of the ECHO system.

## Efficient

- ✓ Optimizes processes for increased efficiency
- ✓ Reduces operational costs
- ✓ Seamless coordination between different stages

## Safe

- ✓ Enhanced safety measures ensuring a safe working environment
- ✓ Remote monitoring and automated controls minimize need for personnel to be close to hazardous areas

## Reliable

- ✓ Redundant hardware and fail-safe functionalities
- ✓ Ensures consistent operation and minimal downtime
- ✓ Monitors equipment and processes for proactive maintenance

## Flexible

- ✓ Scalable and configurable
- ✓ Communicates with existing refinery systems
- ✓ Specifically designed and crucial for ECHO system
